Write a node.js server with express that provides the following functionalities:
- Connect with MySQL database
- Add, Edit, Delete Users
- Upload image for users and store link in database
- Add, Edit, Delete users' cars.
- Upload image for cars and store link in database

Notes:
- Make routes for your project
- Save images in media directory
- Use express-upload or multer for files & images upload
- Send data using form data

Assets:
- MySQL database (vekelz_db)

API links:
- http://localhost:3500/api/user/   (GET, POST, PUT, DELETE)
- http://localhost:3500/api/user/:id   (GET, PUT, DELETE)
- http://localhost:3500/api/cars/   (GET, POST, PUT, DELETE)
- http://localhost:3500/api/cars/:id   (GET, PUT, DELETE)

Expected request bodies:

- http://localhost:3500/api/user/

```
1   [
2     {
3       "id": 10,
4       "firstName": "John",
5       "lastName": "James",
6       "email": "john@email.com",
7       "phone": "12345",
8       "image": "http://localhost:3500/sdfhjsjhfghsjfgsafyugfubcryvsyfugvsusgursh.jpg"
9     },
10    {
11      "id": 34,
12      "firstName": "John",
13      "lastName": "James",
14      "email": "john@email.com",
